Meetings

Wednesday, August 7:

Dr Peter Johnson, of D.S.I.R.

"From Blimbing to Jackfruit: Bits of botany in
Bali and Java"

DSIR building, Cumberland St, 7:30 pm.

Thursday September 12:

Prof. Doug Campbell

"From Glossopteris to Coconuts: Fossil plants of
New Zealand in the Geology Department Museum".
Demonstration and talk on material held in the
Museum.

In the University Geology Dept., (second building
on the right through the old Archway Building,
i.e. behind the Clocktower Building), 7:30 pm.

Field trips

Saturday September 14:

Professor G.T.S. Baylis' garden.

Geoff will give us a guided tour of his extremely interesting garden.

Meet at 367, High Street, at 9:30 am. The trip will disband about midday.

For the following two trips:

Meeting place: Union St (between Gt King and Cumberland Streets)

Transport: Bring a car if you can, but there should be enough spaces for those without their own transport.

Saturday October 12:

Rabbit Island (in Blueskin Bay).

Led by Christ Stewart, DoC.

A short boat trip from Doctors Point. We will help remove some weeds, and then examine the excellent saltmarsh community.

Meet in Union St at 12:15pm. Bring plastic shopping bags, small axes and clippers.

Saturday November 16:

Mopanui - kanuka regeneration, upland shrubland, old pasture, historic dairy farms.

Led by Jill Hamel and Brian Patrick.

The trip will examine forest remnants and regenerating kanuka on a 300 acre block running from Mopanui trig down to Purakanui Railway Station. A short climb of 30 minutes from the road to Mopanui trig.

Meet in Union St at 1pm.
